

Fabric Of Our Reality

The Fabric of our Reality is waves of possibilities, and as the observer, whatever one focuses their attention on, gets fixed into this reality

Changing your focus of attention, changes what gets fixed into this reality

You don't get what you want, you get what you focus your attention on

When one's Wants, Focus of Attention and Beliefs come into alignment, that's when the real magic begins to happen

And because our reality is some form of projection from the Imaginal Realm, this is where one's Imagination comes in, and is why we must picture an end result first, before it can appear into our physical reality
