

Reality Fixing Points

Consciousness
Imagination
Emotions
Language/Numbers/Symbols
Planet & Star Alignments

The above 5 aspects appear to play a function in the construction and operation of the reality we experience

Consciousness – Is the structure/framework that we are within.

Imagination – Is a molding/sculpting tool of this reality.

Emotions – Things done from a position of Love work from a higher frequency than those working from a position of fear, which is a lower frequency of operation.

Language/Numbers/Symbols – Used as fine tuning of this reality.

Planet & Star Alignments – Appears to be marker/setting points for holding this reality for a period of time.

“If you want to find the secrets of the Universe, think in terms of energy, frequency and vibration”

Nikola Tesla
